

GO2DataWorks

COMPANY NO. 17038183 · UNITED KINGDOM

Fibre and cabling crews for **data** **centres.**

Vetted engineers, mobilised across Europe and Asia — with every compliance document in your hands before anyone travels.

Fibre & splicing

Structured cabling

Rack & stack

Test & certification

Crews that arrive **ready to work.**

We supply directly-managed technical crews to main contractors, M&E contractors, integrators and staffing partners on data centre and critical-infrastructure programmes. Not a CV database — every engineer is known to us, vetted by us, and answerable to a named coordinator for the life of the job.

Fibre optic engineers

- Fusion splicing, SM & MM
- OTDR, LSPM, results packs
- MTP/MPO, termination
- Blown fibre, ducting

Structured cabling

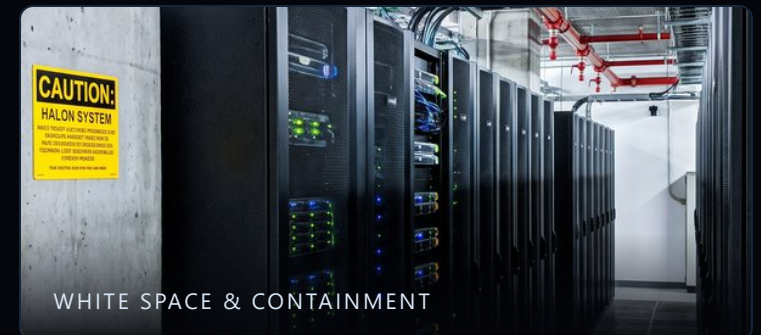

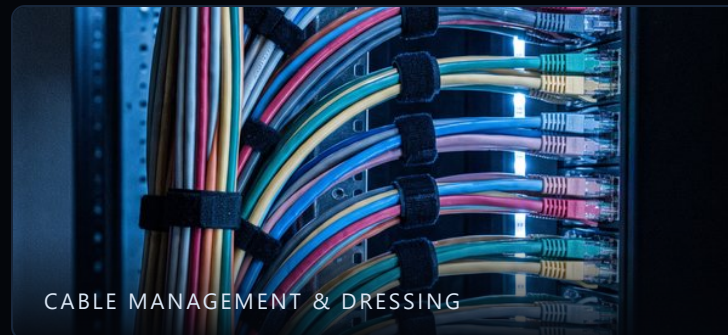

- Cat6 / 6A / 7 install & test
- Tray, basket, ladder, containment
- Dressing, labelling, as-builts
- Patching and MAC works

Data centre works

- Rack build, install, alignment
- Rack & stack, cross-connects
- White-space and MMR support
- Decommissioning, asset removal

Site delivery

- Working supervisors & team leads
- Cable pullers at volume
- Night shift and weekend cover
- Mobilised in waves, not queues

Europe and Asia, **contracted from the UK.**

One UK entity, one invoice, one point of contact — wherever the site is. Cross-border postings are ours to solve: A1 certificates, posting declarations, local site cards, travel and accommodation.

EUROPE

United Kingdom Ireland France Germany Netherlands Belgium

Spain Italy Poland Denmark Sweden Finland Norway

Switzerland Austria Portugal Czechia Romania Bulgaria

Greece

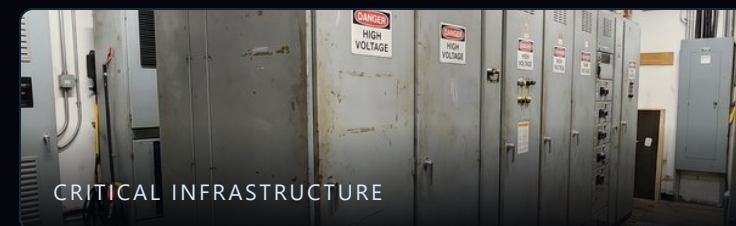

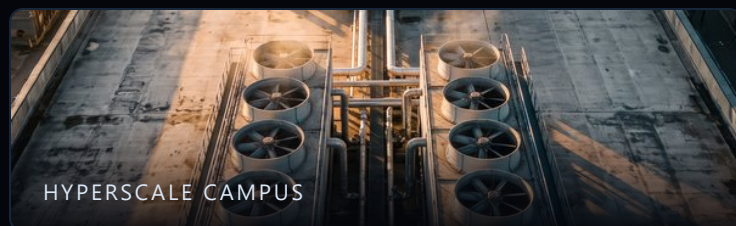

- ❑ **EU-national crews** with freedom of movement — no visa lead time
- ❑ **A1 certificates and posting declarations** completed before travel
- ❑ Local requirements covered: **Carte BTP** (FR), **SOKA-BAU** (DE), **ECS / CSCS** (UK & IE)

ASIA - PACIFIC

Malaysia Singapore Johor / Iskandar Kuala Lumpur Indonesia

Thailand Vietnam Philippines India UAE

- ❑ **Established crews in Malaysia** serving the Johor–Singapore hyperscale corridor
- ❑ **European specialists mobilised into Asia** where splicing, testing and certification skills are scarce locally
- ❑ Long-rotation, day and night shift patterns supported
- ❑ Accommodation, transport and welfare arranged as part of the package

Where our people **have worked.**

Our crews are on live hyperscale data centre projects today, delivering for and alongside established names in critical-infrastructure delivery. We do not print client logos: every current programme runs under a non-disclosure agreement, and a supplier who publishes one client's name has told you exactly what he will do with yours.

Hyperscale campuses

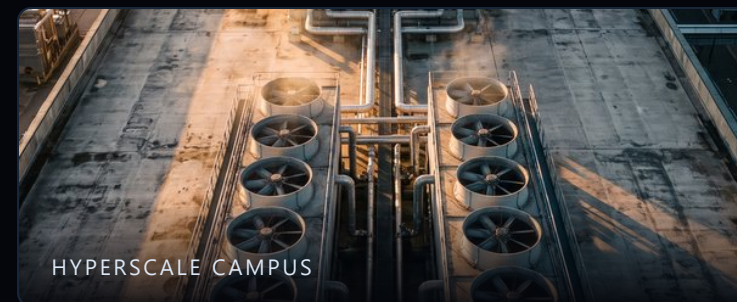

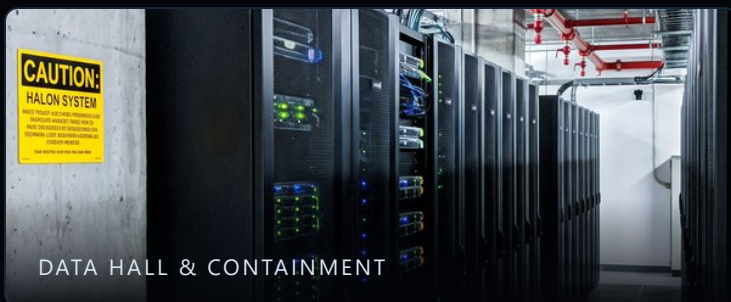

Fibre, containment and white-space works on live hyperscale sites in the UK and mainland Europe, under main-contractor programme control.

Central London commercial

Structured cabling on major central London developments, delivered to tight programme under restricted access and permit conditions.

Cross-border deployments

Full crews mobilised from the UK into mainland Europe and into South-East Asia, with every posting requirement handled in-house.

Sites are not named here for the same reason. **Named references — including direct contact details for project managers we currently supply — are provided on request at tender or PQQ stage, with that client's consent.**

What most labour suppliers **don't** do.

	TYPICAL LABOUR SUPPLIER	GO2DATAWORKS
The people	CVs from a database. The agency has never met the engineer.	Crews we have worked with before, who have worked with each other before.
Compliance	Documents chased after the start date; site access delayed.	Full pack issued to you before mobilisation — right to work, A1, cards, medicals, competence.
Cross-border	"Not our problem" — you handle postings, cards and accommodation.	Postings, local cards, travel and accommodation handled by us as one package.
Rates	Rate moves after mobilisation; extras appear on the invoice.	One rate agreed in writing before travel. Overtime only on your written instruction.
Underperformance	A replacement means a new search, and a new delay.	Replaced from our own bench — your programme does not stop while we recruit.
Your contact	A different account manager every week.	One named coordinator for the life of the project, reachable outside office hours.

Vetted before offered. Documented before mobilised.

Identity & right to work

Passport or ID, share code or permit — and verification that the permit actually allows that work in that country.

Trade competence

Evidence of the discipline claimed, backed by references from previous sites. Not self-declaration.

Cards, tickets, medicals

ECS/CSCS, Carte BTP, SOKA-BAU, electrical authorisation, height, PASMA/IPAF and medical fitness as the site requires.

Contract & insurance

Every operative under written contract, covered by employer's and public liability insurance, back to back with your terms.

STEP 01

Requirement

Trade, headcount, location, duration, shift pattern. A call or an email is enough.

STEP 02

Proposal

Rate in writing with availability and the compliance route for that country — usually same day.

STEP 03

Documentation

Full pack per operative issued for your approval. Nothing starts on a verbal.

STEP 04

On site

Crew mobilised with supervisor, timesheets signed by your site, invoiced weekly.
